

Who We Are:

DR. J K NIGAM
M.Sc. Ag & Ph.D.Ag.
CEO

Ranjana Nigam- MA Economics
Involved in rural society
upliftment with NGOs, MD

Mr Rajeev Gupta
R&D PRODUCTION

Madhup Chaturvedi
Business Director
(GCC Countries)

Dr. Anubrat
Director-
Strategic Planning

Trans Asia Agri Sciences Pvt Ltd

were established in 2021 by Mr Naresh P Chintavar

(a dynamic agro input experts) & Mad. Puspa Chinatvar

(Finance & Custom expert). Its reorganized with

leadership of Dr J K Nigam & Mr Rajeev Gupta.

Now company engaged in R&D based Seed manufacturing & export.

In domestic market company have presence in

UP, Bihar, Chhattisgarh, Jharkhand, West Bengal, Odisha & Assam.

Company extended support to seed start up with mentorship,

bulk supply, packaging & licensing.

Company coming soon with new genomics to combat

global warming issue

F1 HYBRID TOMATOES

RAMYA(TT-511)

Hybrid Type : Tall, Determinate and acidic fruit
Plant Vigour : Strong
Fruit Shape : Flat Round
Fruit Firmness : Good
Shoulder Color : Green Shoulder
Fruit Weight (g) : 80-90
Maturity : Medium
Salient Features :
Tolerant to TLCV, Fruit are glossy, acidic
Very good regeneration ability.

SAUMYA (TT-525)

Plant habit : Determinate & Strong
Fruit Color : Attractive Red
Fruit Weight (g) : 80-100
Firmness & Shelf Life : Good
Days to maturity : 65-70 days
Salient Features :
Good yield potential and can perform good in rainy
Excellent rejuvenating capacity
Uniform & attractive deep red fruits.

LALIMA (TT-533)

Plant habit : Determinate & Strong
Fruit Shape : Flat Round
Fruit Firmness : Good
Shoulder Color : Green Shoulder
Fruit Weight (g) : 80-90
Maturity : Early
Salient Features
Very early hybrid and tolerant to TLCV
Suitable for both staking and non-staking
Acidic and very tasty fruits, High yield potential.

LATA (TT-615)

Plant habit : Indeterminate
Fruit Shape : Oblate Uniform
Fruit Color-Unripe : Green
Fruit Color-Unripe : Deep Red
Fruit Weight (g) : 90-100
Fruit Firmness : Very Good
Fruit Break : Absent
Salient Features
Tall vigorous plants with profuse branching
High yielding hybrid
Good keep quality

F1 HYBRID TOMATOES/CHILLIES

TAAS (TT-621)

Plant habit : Determinate & Robust branching
Plant Vigour : Medium
Fruit Shape : Square Round
Fruit Firmness : Excellent
Fruit Weight (g) : 80-90
Maturity : Early
Disease Tolerance: Good tolerance to bacterial wilt
Salient Features : Good Adaptability
Suitable for both staking and non staking, High yield potential

PRABHAT (TC-703)

Hybrid Type : Dual Purpose
Plant Type : Medium Tall and spreading
Fruit Color : Dark Green (immature), Glossy red (mature)
Fruit Length T(cm): 8-9
Fruit girth (cm) : 0.7-0.9
Fruit Skin : Moderate wrinkles
Pungency : Very High (88700 SHU)
Days to Harvest : 60- 65 (green) Days
Salient Features
Excellent dual purpose hybrid with heat tolerant
Glossy red fruits with very high pungency

SURKHA (TC-777)

Hybrid Type : Dry Chillies
Plant Type : Semi Erect
Fruit Color Immature: Green
Fruit Color Mature : Deep bright Red (150-160 ASTA)
Fruit Pungency : Medium pungent (35000-40000 SHU)
Fruit Skin : Medium wrinkled
Fruit Length (cm) : 15 (Medium)
Fruit Color : Unripe Dark Green and Ripe Dark Red
Days to first Harvest : 65-70 days
Salient Features
Dense bearing and very high yielding, Widely adaptable hybrid

PRABHA (TC-781)

Hybrid Type : Dual purpose
Plant Type : Erect
Immature Fruit Color: Parrot green
Mature Fruit Color : Red
Fruit Length(cm) : 14.5
Fruit Girth (cm) : 1.2
Fruit weight(gm) : 9
Fruit Skin wall thickness(mm): 0.2
Pungency : Medium
Days to first Harvest : 50-55 days
Salient Features
High level of LCV resistance and attractive fruits

F1 HYBRID CHILLI/CAPSICUM

TEJA (TC-791)

Hybrid Type : Dual Purpose
Plant Type : Erect
Fruit Length(cm) : 8-10
Immature fruit : Green
Mature fruit : Red
Fruit Skin : Smooth
Pungency : Very High, 92450 SHU
Days to first Harvest: 60-65 days
Salient Features
Excellent hybrid with upright fruits
High tolerance to sucking pests and heat tolerant

PASSRELLA (TC-211)

Plant Habit : Medium tall Bushy and Vigorous
Plant Foliage : Dense foliage with dark green leaves
Fruit Shape : Thick Walled and 3-4 lobed
Fruit Color : Dark Green and Glossy
Fruit Weight(g) : 170
Fruit Length(cm) : 10-12
Fruit girth (cm) : 10
Days to first picking: 50-55 Days
Salient Features
Longer Shelf life and ideal for long transportation,
High Yielding capacity Suitable for both open field and net house conditions

TAAS-WONDER (TC-215)

Type : Open Pollinated Variety
Plant Habit : Vigorous
Fruit Shape : Bell Shaped and Blocky(3-4 lobed)
Fruit Color : Green and red at maturity
Fruit Weight(g) : 180-200
Days to first picking: 70 Days
Salient Features
Very High Yields
Highly suitable for gardens and green houses

ILLANGO (TC- 1115)

Plant Habit : Medium tall Bushy and Vigorous
Plant Foliage : Dense foliage with dark green leaves
Fruit Shape : Thick Walled and 3-4 lobed
Fruit Color : Dark Green and Glossy
Fruit Weight(g) : 170
Fruit Length(cm) : 10-12
Fruit girth (cm) : 10
Days to first picking: 55-65 Days
Salient Features
Longer Shelf life and ideal for long transportation,
High Yielding capacity Suitable for both open field and net house conditions

F1 HYBRID BRINJAL

PINKY(TB-735)

Plant Growth habit : Semi erect
 Leaf spyness : Non Spiny
 Calyx color and spyness : Dark Green, non spiny
 Fruit Shape : Medium Long
 Fruit Color : Light purple
 Fruit weight(g) : 60-80
 Fruit bearing : Cluster
 Days to first picking : 45-55 days
 Salient Features : Early hybrid and attractive long fruits
 Less seed content and good in taste, Prolific fruit bearing capacity

SAFEDA (TB-789)

Plant Growth habit : Erect
 Leaf spyness : Non Spiny
 Calyx color and spyness : Green and non spiny
 Fruit Shape : Long
 Fruit Color : White
 Fruit weight(g) : 50-65
 Fruit bearing : Clusters
 Days to first picking : 90-94 days
 Salient Features
 High yield
 Excellent keeping quality

BANTY (TB-761)

Plant Growth habit : Semi Spreading
 Leaf spyness : Non spiny
 Calyx color and spyness : Green with purplish tinge and non spiny
 Fruit Shape : Oval Round
 Fruit Color : Jamuni Purple
 Fruit Weight(g) : 200-350
 Days to first picking : 95-100 days
 Salient Features
 Low seed content in fruit
 Suitable for bharta preparation
 Excellent keeping quality

JAMBO (TB-501)

Plant Type : Erect
 Leaf Type : Okra
 Fruit Color : Dark Green
 Fruit Length (cm) : 12 -14
 Days to first picking: 40-45 days
 Salient Features
 High tolerance to YVMV
 Very attractive dark green color export quality seeds
 Short internodes and High yield potential
 Good keeping quality

F1 HYBRID OKRA

RAGINI (TO-511)

Plant Type : Erect
Leaf Type : Okra
Fruit Color : Dark Green
Fruit Length (cm) : 14 -16
Days to first picking: 42-45 days
Salient Features
High tolerance to YVMV
Attractive dark green color export quality seeds
High yield potential
Good keeping quality

AGREEM (TO-521)

Plant Type : Tall Erect
Leaf Type : Okra
Fruit Shape : Cylindrical and slender
Fruit Color : Dark Green
Fruit Length (cm) : 12-14
Days to first picking : 50-52 days
Salient Features
High tolerant to YVMV
Good branching with Short internodes
Very good keeping quality
High yield potential

ARYAN (TO-551)

Plant Type : Erect
Leaf Type : Broad, Medium Lobed
Fruit Color : Dark Green
Fruit Length (cm) : 12-15
Days to first picking : 45-50 days
Salient Features
Resistant to YVMV
Very short & more number of internodes
Attractive to dark tender fruits
Least preferred to shoot and fruit-borer

SONALI (TO-501)

Plant Type : Erect
Leaf Type : Okra
Fruit Color : Dark Green
Fruit Length (cm) : 12-14
Days to first picking: 40-45 days
Salient Features
High tolerance to YVMV
Very attractive dark green color export quality seeds
Short internodes and High yield potential
Good keeping quality

F1 HYBRID BOTTLE, RIDGE GUARD

KOMAL (TB-1011)

Plant Vigour : Very High
Fruit Color : Dark Green Specks
Fruit Shape : Long Cylindrical
Fruit Length (cm) : 55-60
Fruit Weight (g) : 900-1000
Days to first pick : 50-55 Days
Crop Duration : 120-130 Days
Salient Features
Rind is smooth with flesh and slow seed maturity
Heavy yielder

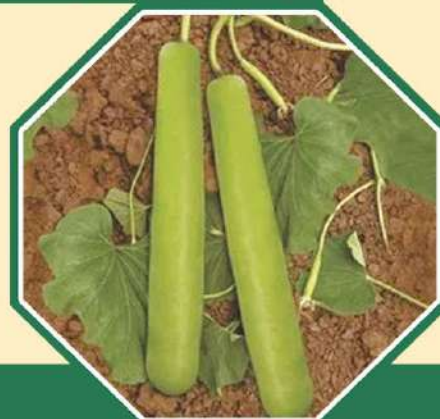

LATTU (TB-2011)

Plant Vigour : High
Fruit Color : Green
Fruit Shape : Round
Fruit Weight (g) : 300-350
Days to first pick : 45-50 Days
Crop Duration : 110-120 Day
Salient Features
High yield potential
Early hybrid with attractive round fruits
Good keeping quality

SUKOMAL (TB-1001)

Plant Vigour : Very High
Fruit Color : Green
Fruit Shape : Long Cylindrical
Fruit Length (cm) : 35-40
Fruit Girth (cm) : 18-20
Average Fruit Weight (g) : 400-450
Days to first pick : 52-54 Days
Crop Duration : 110-120 Days
Salient Features : Vigorous, prolific and continuous bearing
Very good firmness and juicy fruit, Good keeping fruit

SAVITA (TB-1021)

Plant Vigour : Very high
Fruit Shape : Medium Long With Deep Ridges
Fruit Color : Green
Fruit Length (cm) : 35-40 cm
Fruit Firmness : Very Good
Seed Content: Less
Flesh Texture : Very Tender and Soft
Fruit Weight (g) : 200-230
Days to first picking : 45-48 Days
Crop Duration : 110-120 Days
Salient Features
Prolific and Continuous fruit bearing
Excellent for packing and shipping, Tolerant to heat and downy mildew

F1 HYBRID

SPONGE, BITTER GUARD

SUREKHA (TSG-1011)

Plant Vigour : Very High
 Fruit Shape : Cylindrical medium long
 Fruit Length (cm) : 25-30
 Fruit Firmness: Medium
 Fruit Color : Dark Green
 Seed Content : Less
 Fruit Texture : Very tender
 Fruit Weight(g): 120-130
 Days to first harvest : 38-42 Days
 Salient Features : Early harvesting and highly uniform fruits
 Extended shelf life

SWETA (TSW-1001)

Plant Vigour : Very High
 Fruit Shape : Cylindrical medium long
 Fruit Length (cm) : 30-35
 Fruit Firmness: Medium
 Fruit Color : Light Green
 Seed Content : Less
 Fruit Texture : Very tender
 Fruit Weight (g) : 125-140
 Days to first harvest:40-45 Days
 Salient Features
 Prolific and continuous bearing
 Slow seed maturity

PALLAVI (TB-2021)

Plant Vigorous : Very High
 Fruit Shape : Spindle, thick, long
 Fruit Color : Dark Green
 Fruit Length(cm): 20-25
 Fruit Girth(cm) : 4-5
 Presence of prickles: Yes, Pointed
 Intense of prickles : More
 Fruit Weight (g) : 150-160
 Days to first picking : 50-55 days
 Crop duration : 110-120 days
 Salient feature
 High yielding and suitable for long distance transportation
 Prolific and continuous fruit bearing, Attractive fruits with pointed and flexible spines

NATU BOLD (TB-2031)

Plant Vigour : Very High
 Fruit Shape : Cylindrical medium long
 Fruit Length (cm) : 30-35
 Fruit Firmness: Medium
 Fruit Color : Light Green
 Seed Content : Less
 Fruit Texture : Very tender
 Fruit Weight (g) : 125-140
 Days to first harvest:40-45 Days
 Salient Features
 Prolific and continuous bearing
 Slow seed maturity

F1 HYBRID

BITTER GUARD, PUMPKIN, WATER MELON

KOHIMA (TB-2023)

Plant Vigorous : Very High
 Fruit Shape : Spindle, thick , long
 Fruit Color : Dark Green
 Fruit Length(cm): 20-26
 Fruit Girth(cm) : 3.5-4
 Presence of prickles: Sharp
 Intense of prickles: More
 Fruit Weight (g) : 110-120
 Days to first picking : 50-60 days
 Crop duration : 120-130 days
 Salient feature: Prolific and continuous fruit bearing
 Very good quality keeping, Excellent for juice purpose

BOSS (TP-950)

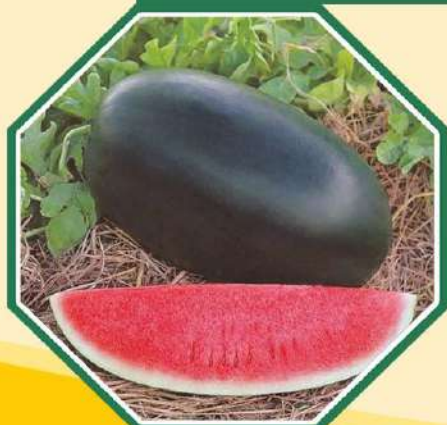

Fruit Shape : Flat round fruit shape
 Fruit Color : Uniform blackish green
 Fruit Flesh : Dark Yellow
 Grooves : Medium Deep
 Fruit Weight (kg) : 4-5
 Days to first harvesting : 85 days

CHARLIE (TW-951)

Plant Vigour : Very Good
 Fruit Shape : Round
 Fruit Color : Blackish Green
 Fruit Weight (kg) : 6 - 8
 Flesh : Dark red with granular texture
 TSS (Brix) : 11-12%
 Days to Harvest : 90-95 Days
 Salient Features
 High yield potential
 Sweet and very crispy flesh
 Suitable for long distance transportation

CHAMP (TW-911)

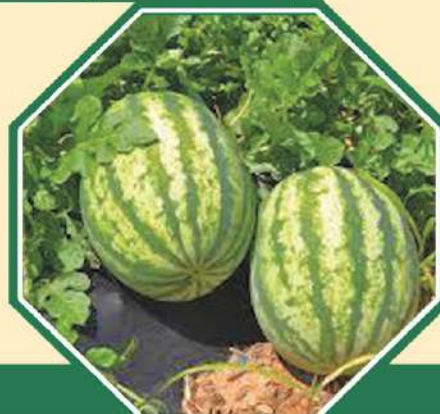

Plant Vigour : Very Good
 Fruit Shape : Cylindrical
 Fruit Color : Bluish black with highly faded stripes
 Fruit Weight (kg) : 3 - 3.25
 Flesh : Deep Crimson and granular texture
 TSS (Brix) : 12-13%
 Days to Harvest : 62-65 Days
 Salient Features
 High yield potential
 Suitable for long distance transportation

F1 HYBRID WATER, MUSK MELONS BALWAN (TW-1021)

Plant Vigour : Good
Fruit Shape : Oval
Fruit Color : Light green with dark green stripes
Fruit Weight (kg) : 8 - 10
Flesh : Dark red
TSS (Brix) : 12%
Days to Harvest : 80-85 Days
Salient Features
High yield potential
Tolerant to abiotic stresses
Suitable for long distance transportation

RASEELI (TW-915)

Plant Vigour : Very Good
Fruit Shape : Oblong
Fruit Color : Light green with dark green stripes
Fruit Weight (kg) : 8 - 12
Flesh : Deep red with granular texture
TSS (Brix) : 12-13%
Days to Harvest : 90-95 Days
Salient Features
High yield potential
Good Keeping Quality
Suitable for long distance transportation

REKHA (TM-5016)

Plant Vigour : Very Good
Fruit Shape : Oval
Fruit Color : Light green nets
Fruit Weight (kg) : 1.5 - 2
Flesh : Deep salmon with good texture
TSS (Brix) : 13-14%
Days to Harvest : 60-65 Days
Salient Features
Early High yielding hybrid
Excellent colour and tight seed cavity
Suitable for long distance transportation

MADHURI (TM-5011)

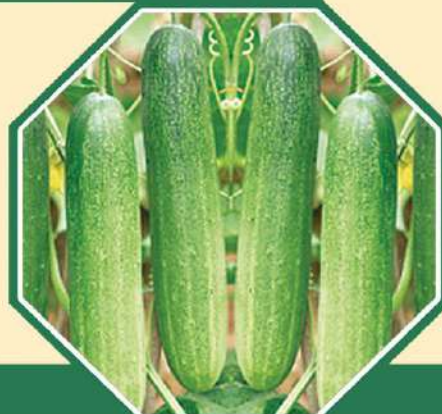

Plant Vigour : Very Good
Fruit Shape : Globe shaped
Fruit Color : Buff yellow with fine nets
Fruit Weight (kg) : 1.2 - 1.5
Flesh : Orange
TSS (Brix) : 12-14%
Days to Harvest : 75-80 Days
Salient Features
Flesh is thick, tender orange colour with aroma wide adaptability
Suitable for long distance transportation

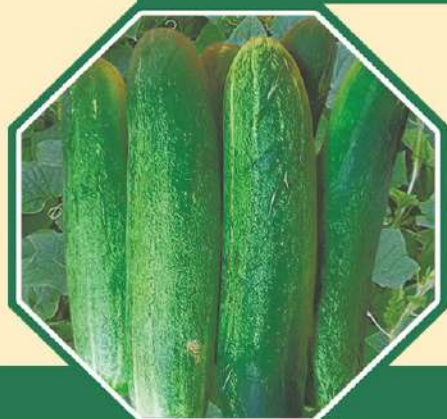

F1 HYBRID CUCUMBER, BEETROOT KAVITA (TC-811)

Plant Vigour : Medium
Fruit Shape : Cylindrical
Fruit color : Dark Green Shiny Fruits
Fruit length(cm) : 18-22
Fruit girth(cm): 4-5
Fruit weight (g): 150-180
Days to first harvest : 40-45 days
Salient Features
Widely adaptable
Prolific yielder

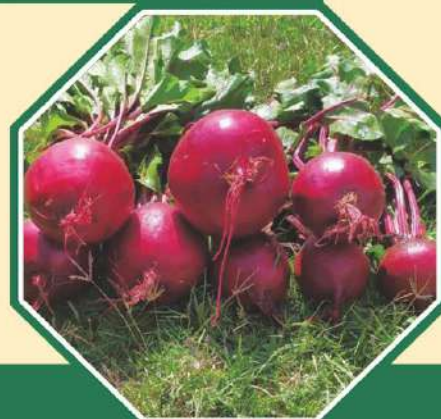

AVITA (TC-801)

Plant Vigour : Very Good
Fruit Shape : Cylindrical
Fruit color : Light Green
Fruit length(cm): 19-20
Fruit girth(cm): 4-5
Fruit weight(g): 200-250
Days to first harvest : 43-45 days
Salient Features
Widely adaptable
High yielder

SABINA (TB-1097)

Type : Improved
Root Shape : Round to flat round
Root Color : Medium Red Colour
Average Root Weight (g) : 55-70
Root flesh color : Crimson Red
Days to maturity : 55-60 Days
Salient Features
Roots are uniform and very sweet in taste

RASHMI (TB-1011)

Type : Hybrid
Root Shape : Round
Root Color : Deep Red Colour
Average Root Weight (g) : 75-80
Root flesh color : Blood red in color
Days to maturity : 80-85 Days
Salient Features
Roots are very sweet in taste

F1 HYBRID

CAULIFLOWER, CABBAGE, CARROT

MIRACLE (TC-821)

Plant Type : Small
 Curd Shape : Dome
 Curd Color : White
 Curd Weight (kg): 0.5
 Curd Firmness : Excellent
 Curd Protection: Open
 Days to maturity: 55-55 Days
 Salient features
 Early tropical hybrid
 Excellent choice for fresh market growersMid Season type

NIDHI(TC-1001)

Head Shape : Round Compact
 Foliage Color : Bluish Green
 Head Firmness : Very Good
 Core Length : Medium
 Head Weight(kg): 1.4-2.0
 Days to maturity : 60-70 days
 Salient Features
 Head is perfect round with excellent internal structure
 Excellent field holding capacity
 Ideal for cultivation in Autumn & Spring

DESI RAJU (TC-995)

Plant Vigour : Excellent
 Root Shape : Tapering
 Root Color : Deep Red
 Root Length(cm): 25-30
 Root Diameter(cm): 3-5
 Core : Small
 Root Tip : Blunt
 Root Weight(g): 160-180
 Sweetness : Good
 Days to Maturity : 80-90 Days
 Salient features : Roots are smooth with excellent color and shape
 Flesh is very sweet and crisp High disease tolerance
 Good Storage and transport qualities

KURODA GOLD (TC-915)

Plant Vigour : Excellent
 Root Shape : Cylindrical
 Root Color : Deep Orange
 Root Length(cm): 15-22
 Root Diameter(cm): 3-5
 Core : Small
 Root Tip : Blunt
 Root Weight(g): 150-175
 Sweetness : Good
 Days to Maturity : 75-80 Days
 Salient features : Roots are smooth with excellent color and shape
 Flesh is very sweet, crisp and good storage and transport qualities
 High disease tolerance

F1 HYBRID ONION, RADISH

SHIVANI (GAVRAN)

Bulb Shape : Flattish Globe
Color : Light Red
Weight(g) : 75-80
Days to maturity : 100-11 Days
Season : Kharif to late kharif, Rabi - Oct-Nov
Salient Features
Good Keeping Quality
Suitable for cultivation all over india

SHIVAM (TO-53)

SHIVANI RED
Bulb : Round Shaped
Color : Dark Red
Weight(g): 75-80
Days to maturity : 100-110 Days
Season : Oct-Nov
Salient Features
Good Keeping Quality
Suitable for cultivation all over India

ARYAN EARH

Plant Vigour : Excellent
Root Shape : Short, Cylindrical
Root Color : Pure White
Root Length(cm) : 12-15
Root Diameter(cm) : 3-4
Green Shoulder : Absent
Days to maturity : 30-35 Days
Salient Features
Roots are smooth, semi cylindrical with tapering end
Leaves are soft and tasty
Suitable for Cultivation throughout the yea

ARYAN PALAK PATTA

Type : Improved
Plant Vigour : High
Root Shape : Tapering
Root Color : Pure White
Root Length(cm) : 25-30
Root Diameter(cm) : 3-5
Green Shoulder: Absent
Days to maturity : 40-42 Days
Salient Features
Roots are smooth, semi cylindrical with tapering end
Leaves are soft and tasty
Suitable for Cultivation in summer and rainy seasons

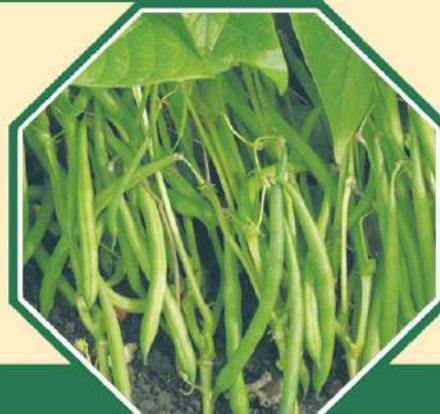

F1 HYBRID

FRENCH, CLUSTER BEANS, PEAS FALGUNA (TF-333)

Plant Type : Bushy and upright
Growth habit : Indeterminate
Pod Length(cm) : 13-15
Pod Color : Light Green
Ten pod weight(g) : 80-90
Days to first harvest : 60 Days
Salient features
Suitable for both kharif and rabi seasons
Plants are strong with stringless pods
High yielding potentia

USHA (TC-1001)

Plant Type : High
Pod Color : Attractive light green pods
Pod Length (cm) : 6-8
Pod size : Medium
Avg. Weight (g) of 50 pods : 41
Days to first harvest : Kharif-55-60 days & Rabi-70-75 days
Salient features
Moderately resistant to powdery mildew disease
Very High yielding variety

HARSHA (TC-1011)

Plant Type : High
Pod Color : Bright Green
Pod Length (cm) : 15
Pod size : Medium
Pod bearing : Cluster
Seed Color : Creamy white
Avg. Weight (g) of 50 pods : 41
Days to first harvest : Kharif-55-60 days & Rabi-70-75 days
Salient features
Erect, bushy and very high yielding
Pods are smooth, longer with better quality

OYSTER GOLD

Pod Shape : Curved / Straight
Pod Length : 8-10 cm
Seeds per pod : 10 grains
Pod Color : Dark Green
Pod bearing : Double
Days to maturity : 60-65 days
Salient feature
Wider adaptability
Very high yielding

F1 HYBRID PADDY

SONA (TP-999)

Type : Hybrid Paddy
Grain Type : Coarse
Maturity : 120-125days
Salient Features
Medium early duration with long bold grains.
High yielding hybrid
Resistant to bacterial leaf blight (BLB)
Pack Size : 1kg & 3kg

HEERA GOLD-444

Type : Hybrid Paddy
Grain Type : Coarse
Maturity : 135-140 days
Salient Features :
High productive tillers and wider adaptability
More than 70% milling
Resistant to bacterial leaf blight (BLB)
Pack Size : 1kg & 3kg

PADMA (TP-911)

Type : Improved Paddy
Grain Type : Coarse
Maturity : 120-125 days
Salient Features
Medium bold grain
High Yielding Variety Tolerance to major pests and diseases
Pack Size : 3kg

ANUPAMA

Type : Improved Paddy
Grain Type : Long Slender
Maturity : 125-130 days
Salient Features
Semi Dwarf resistant to lodging
High yielding variety with good cooking quality
Pack Size : 6kg

F1 HYBRID PADDY, MAIZE, FORAGE ANNAM GOLD

Type : Improved Paddy
Grain Type : Fine
Maturity : 120-125 days
Salient Features
High Yielding Variety with High Milling Percentage
Fine and attractive golden yellow grain
Cooked is soft, tender and tasty
Pack Size : 3kg, 6kg & 10kg

TMH-25

Plant Height (cm) : 240-260
Grain Color : Golden Yellow
Shank Color : Violet
Season : Rabi/Kharif
Days to harvest : Rabi-150 days/Kharif-120 days

TMH-355

Plant Height (cm) : 210-240
Grain Color : Golden Yellow
Shank Color : Light Purple
Season : Rabi/Kharif
Days to harvest : Rabi-155 days/Kharif-120 days

RASSILI

Type : Multi cut Very fast growing
Seed Colour : Red
No. of cuts : 3-5
HCN content : 70-80 ppm (Low)
Salient Features
High crude protein and High digestability
Resistance to DM

F1 HYBRID FORAGE, MUSTARD, SUNFLOWER

MAKHMAL

Type : Multi cut Very fast growing
Seed Colour : White
No. of cuts : 3-5
HCN content : 70-80 ppm (Low)
Salient Features
High crude protein and High digestability
Resistance to DM

BHAIRVI

Type : Hybrid Mustard Variety
Duration : 120-130 days
Plant Habit : Erect, Vigorous and Tall
Seeds Persiliqua : 16-18
Seed Color : Black Mustard Seed
Salient Features
High Yield Potential and High oil content
Tolerant to powdery mildew, white rust and selerotina rot diseases

ARYAN GOLD

Type : Improved Mustard Variety
Duration : 115-125 days
Plant Habit : Erect and Vigorous
Seed Color : Yellow Mustard Seed
Salient Features
Good Yield and High Oil Percentage & Suitable for all well drained soil

ARYAN - 2775

Plant Habit : are medium tall,
: Robust growth, Versatile hybrid
(Suitable for all type of soils & Agro climatic conditions)
Head Medium, Convex, Semierect, uniform,
completely filled up to the centre;
seed setting very attractive
& good eye appeal. Widely adopted,
medium duration 95- 105 days.
Good yield potential & 42-43% oil content.
Uniform maturity
